PROFILE SUMMARY

Microsoft Certified in Azure Fundamentals, I am a Data Analyst with strong skills in Excel, SQL, Python, and Power BI. Proficient in data cleaning, visualization, reporting, and generating actionable business insights to support decision-making. Passionate about leveraging data to solve problems and drive business growth.

EDUCATION

Priyadarshini Bhagwati College of Engineering, **Nagpur** **2023 - present | CGPA - 6.6**

B.Tech - Electronics & communication

HSC(12 th) **2023 | 69%**

SSC(10th) **2021 | 87.60%**

SKILLS

- **Languages**: Python, SQL
- **Frameworks**: Pandas, Numpy, Matplotlib, Seaborn
- **Tools**: Power BI, Excel, Google Sheets, Word, PowerPoint, PostgreSQL
- **Platforms**: Visual Studio Code, Jupyter Lab
- **Soft Skills**: Good Communication, Good Teamworking qualities.

PROJECTS

Vendor Performance Analysis | Python, SQL, Power BI | LINK

Objective: Analyzed vendor efficiency and profitability to support strategic purchasing and inventory decisions**.**

- Developed and optimized a complex SQL ETL pipeline to build an aggregated summary table from multiple tables. Improved query performance using CTEs and data filtering, significantly reducing processing time for large datasets.
- Conducted Exploratory Data Analysis and Hypothesis Testing in Python solving research questions to evaluate vendor profitability, pricing strategy effectiveness, and inventory turnover.
- Identified over-dependence on top 10 vendors (65.7% of purchases) and uncovered $2.71M in unsold inventory from low-performing vendors, recommending diversification and inventory optimization.
- Built interactive Power BI dashboards to visualize vendor performance, profit margins, bulk purchasing impact (72% cost reduction), and actionable insights for decision-makers.

Customer Behaviour Analysis | Python, SQL, Power BI | LINK

Objective: Performed end-to-end analysis of customer purchase data to identify buying patterns, revenue drivers, and customer segmentation insights.

- Performed Data Cleaning and Data Transformation on raw transactional datasets using Python (Pandas, NumPy).
- Wrote advanced SQL queries (JOIN, GROUP BY, Window Functions) to analyze sales trends and customer metrics.
- Conducted Exploratory Data Analysis (EDA) to identify seasonal trends, revenue drivers, and high-value customer segments.

Swiggy Data Analysis | Python, Excel, Power BI | LINK

Objective: Analyzing and cleaning the dataset provided by Swiggy. Swiggy is a popular food delivery service in India, and the dataset includes various tables related to food items, menus, orders, order types, restaurants, and users. The goal is to clean the data, format the tables, and store the processed dataset for further analysis.

- Handled null values across all tables and ensured data accuracy.
- Renamed columns for clarity and consistency, removed irrelevant columns, and eliminated unnecessary tables to streamline the dataset and improve data quality for analysis
- Loaded cleaned datasets into **Power BI**, performed data transformations using **Power Query** (merging tables, extracting date components, and shaping data), established relationships using primary and foreign keys, and developed insightful visualizations to identify trends and support data-driven decision-making.

CERTIFICATES

AZURE FUNDAMENTALS (MICROSOFT) | CERTIFICATE **Feb 2025**

- Knowledge of cloud concepts, core Azure services, and basic cloud security
- Understanding of Azure pricing, SLA, and lifecycle

POWER BI | CERTIFICATE **Feb 2025**

- Gained hands-on experience in data transformation, KPI reporting, and business intelligence solutions using real-world datasets.
- Completed a 45-day Power BI Internship with hands-on experience in data modeling, DAX, Power Query, ETL processes, and dashboard development.
